

Because of a wooden cycle track surrounding the entire area, the wearing of sport shoes is compulsory.

The hall is used and has been used to organize numerous inside free flight competitions (French championship, international events as well as inside radio-controlled competitions)

The outside temperature does influence flights of aeromodels. During the month of October the outside temperature usually is between 20° and 25°C, whereas the inside temperature tends to be up to 5°C higher, especially in the pyramidal center of the stadium where particularly in the late afternoon it may even exceed 10° to 15° C.

A special entrance allows handicapped persons access to the center floor area.

Access to the Stadium is available thru an internally remote-controlled fence.

Free parking-space at the disposal of competitors.

Helium will be provided to teams by organizers.

Tables will be provided to all competitors, with possibility of individual lights.

SCHEDULE

-Monday 3rd October: Arrival, accommodation and registration at Hotel Campanile.

-Tuesday 4th October: Training session, opening ceremony, technical meeting.
